26. Overview of the entity's material responsible business conduct issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications¹

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Energy Management	Risk	Energy is crucial for the Company in the aerospace and Defence manufacturing sector, with electricity being the primary expense, followed by purchased fuels. The specific energy sources, consumption levels, and management strategies vary based on the products manufactured. The energy mix, including on-site generation, grid electricity, and alternative energy, affects the cost and reliability of the energy supply. Consequently, this can influence the Company's cost structure and is an operational risk.	The Company recognizes the criticality of energy management in the aerospace and defence manufacturing sector, where electricity is the primary expense followed by purchased fuels. To address this, the Company is striving to manage its energy consumption effectively and reduce its environmental footprint. Efforts include planting trees, optimizing air conditioning usage, and exploring alternative energy sources to ensure a reliable and cost-effective energy supply. These initiatives are part of the Company's broader strategy to mitigate operational risks.	Negative * There was no negative financial impact in the reporting period of FY 23-24.
2.	Hazardous Waste Management	Risk	Manufacturing aerospace and Defence products can produce hazardous process waste, such as heavy metals and wastewater treatment sludge. Companies encounter regulatory and operational challenges in managing this waste, as certain types are regulated for transport, treatment, storage, and disposal.	Adopting effective waste management strategies with minimal environmental impact is the key to mitigate this risk. Waste treatment, disposal, recycling and / or recovery activities, while initially requiring investment or operating costs, can lower an entity's long-term cost structure and reduce the risk of remediation liabilities or regulatory penalties. At DCX, hazardous waste is carefully categorized and properly disposed of in accordance with both local and national regulations. This meticulous approach ensures that the handling, treatment, and disposal of hazardous materials meet all legal requirements and safety standards.	Negative * There was no negative financial impact in the reporting period of FY 23-24.
3.	Product Quality & Safety	Opportunity	Product Safety is critical for aerospace and Defence entities due to their significant role in aviation and military operations. The Company is a preferred Indian Offset Partner (IOP) for IAI Group, Israel, specializing in the Indian defense market and catering to foreign OEMs for classified products. The products are constructed according to the customers' design and specifications. Manufacturing and testing follow standard operating procedures using Automatic Testing Equipment (ATEs) supplied by the Original Equipment Manufacturers (OEMs), ensuring compliance with quality and safety standards.	Not Applicable	Positive

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4.	Data Security	Risk	Given the aerospace and Defence industry's involvement in developing sensitive military and advanced aviation products, entities within this sector face a heightened risk of cyber-attacks. These attacks can target proprietary technologies, confidential military data, and critical infrastructure systems. Compromised information systems due to data security breaches can lead to significant costs, including financial losses, damage to reputation, legal liabilities, and loss of intellectual property. Moreover, such breaches can disrupt operations, jeopardize national security, and erode the trust of clients and government agencies.	The Company prioritizes data security due to its role in defence and aerospace manufacturing. To safeguard all aspects of data security, the Company has dedicated resources and established Standard Operating Procedures for information security, cyber-attacks, and data theft. Regular security audits and vulnerability assessments are conducted to identify and address potential weaknesses and associated risks. Implementing employee training programs on cybersecurity best practices is essential. Collaborating with cybersecurity experts and participating in information-sharing networks enhances threat intelligence. By taking these preventive measures, the Company aims to minimize the financial and reputational impacts of data breaches, ensuring system integrity, protecting client information, and maintaining customer trust.	Negative * There was no negative financial impact in the reporting period of FY 23-24.
5.	Materials Sourcing & Efficiency of supply chain	Risk	Aerospace and defence entities encounter supply chain risks related to the use of critical materials in their products. These materials, which have limited or no substitutes, are often sourced from deposits concentrated in a few countries, making them vulnerable to geopolitical uncertainties. Additionally, increasing global demand from various sectors heightens competition, resulting in price hikes and supply risks. To mitigate the financial impacts of supply disruptions and fluctuating input prices, entities in this industry can explore alternative options and actively secure their supply chains to reduce reliance on critical materials.	To mitigate the supply chain risks associated with critical material sourcing, the Company has implemented strategic measures. It engages with pre-approved and vetted suppliers in accordance with OEM requirements. This approach, combined with established supply chain management, ensures that the Company is protected from delays or damage to materials needed for manufacturing, because of the well-planned schedules for timely deliveries. Building strong supplier relationships and implementing robust supply chain management practices, such as monitoring and early warning systems, further enhance resilience.	Negative * There was no negative financial impact in the reporting period of FY 23-24.
6.	Business Ethics	Opportunity	Aerospace and defence entities operating in regions with robust business ethics laws may face regulatory scrutiny due to their operations and sales in areas with less stringent enforcement of such laws. Consequently, implementing strong governance practices can help mitigate the risk of breaching business ethics laws and facing regulatory penalties or negative impacts on brand value. To ensure effective governance and address pertinent issues, the Company has adopted and follows all applicable regulations and laws.	Not Applicable	Positive

- 5. Specific commitments, goals and targets set by the entity with defined timelines, if any.** To ensure continuous upgradation and timely renewal of certifications, the Company sets specific commitments, goals, and targets with defined timelines. These structured objectives serve as a comprehensive plan for tracking progress and achieving re-certification within predetermined time frames. By establishing clear timelines and milestones, the Company can systematically monitor and manage the certification process, ensuring that all necessary steps are completed on time.
- This approach promotes ongoing expertise development by encouraging employees to engage in continuous learning and skill enhancement. Regularly scheduled evaluations and assessments ensure that the workforce remains proficient and up-to-date with the latest industry standards and practices. Additionally, ensuring compliance with regulatory requirements enhances the Company's overall credibility and reliability in the market.
- 6. Performance of the entity against the specific commitments, goals and targets along-with reasons in case the same are not met.** The Company has identified a set of long-term sustainability goals and objectives, which we diligently track on an annual basis. To support these objectives, we have developed a comprehensive action plan that encompasses various key components such as resource allocation, stakeholder engagement, performance measurement, and continuous improvement.
- The action plan ensures that resources are effectively allocated to the most critical areas, facilitating the achievement of sustainability targets. Engaging stakeholders is a crucial part of this strategy, ensuring that all parties are aligned and working collaboratively towards shared sustainability goals. Performance measurement mechanisms are put in place to monitor progress, identify areas for improvement, and ensure accountability. Continuous improvement processes are integrated into the plan to ensure that sustainability practices evolve and adapt over time, enhancing the effectiveness.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes

In our establishment, we have implemented a comprehensive waste management strategy designed to handle, store, and dispose of various types of waste generated from our operations. Hazardous wastes, including used oils, e-waste, and chemical residues, are carefully stored in designated containers at their point of origin and then transferred to the scrap yard or identified disposal areas, ensuring no spillage or contamination occurs. We segregate metal scraps, e-waste, and

other hazardous materials, which are then responsibly disposed of through authorized recyclers and vendors. Additionally, we have minimized the use of hazardous and toxic chemicals in our products and processes by adopting eco-friendly alternatives where possible. Our strategy also includes regular supervision and strict adherence to environmental, health, and safety guidelines, ensuring that all waste handling and disposal practices safeguard both human health and the environment.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:

S. No.	Location of operations/offices	Types of operations	Whether the conditions of environmental approval / clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
--------	--------------------------------	---------------------	---

The Company refrains from conducting its operations in environmentally fragile or ecologically sensitive regions. This strategic decision underscores the Company's commitment to responsible business practices and environmental stewardship, avoiding potential harm to delicate ecosystems. By deliberately choosing locations that are not ecologically sensitive, the Company aims to minimize its environmental impact and contribute to the preservation of biodiversity and natural habitats.
